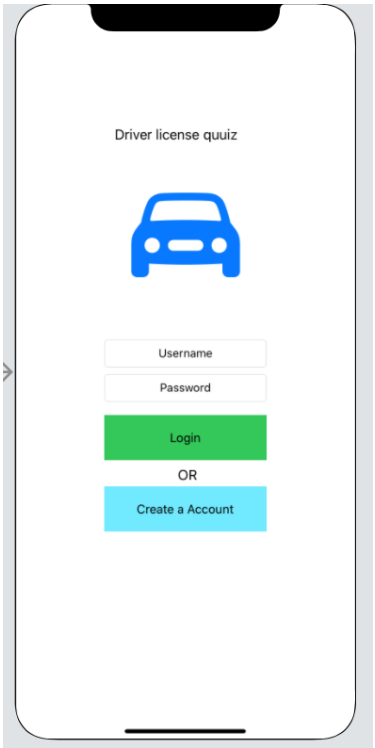
Driver license quiz app

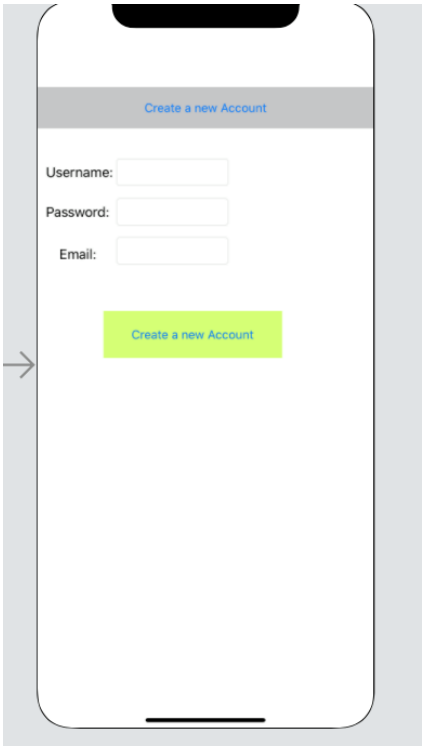
The project work is an application where the people can practice their knowledge about theory test for driver license. The application has 4 different ViewControllers where user can log in or create account to participate, the test will include text and pictures with choose questions and every quiz will be 10 questions. When the user is done with quiz, they can see their score and can repeat the quiz.

The user must create account so they can access to quiz and save their scores in database, The questions will be saved in Firebase Database and the app will fetch the data from it, the app will random fetch 10 questions and display it for user.

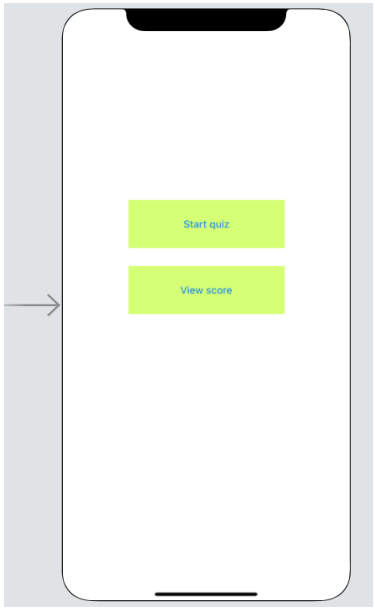
When the user is done with the quiz the app will display the score and save it so the user can have access to old scores.

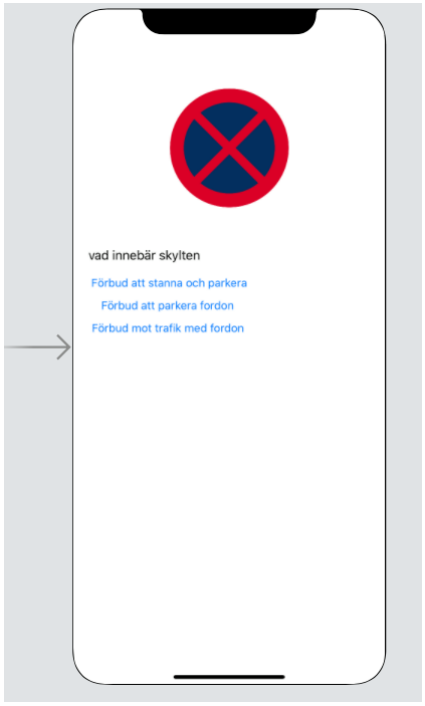
Here the main page where user can log in or create account

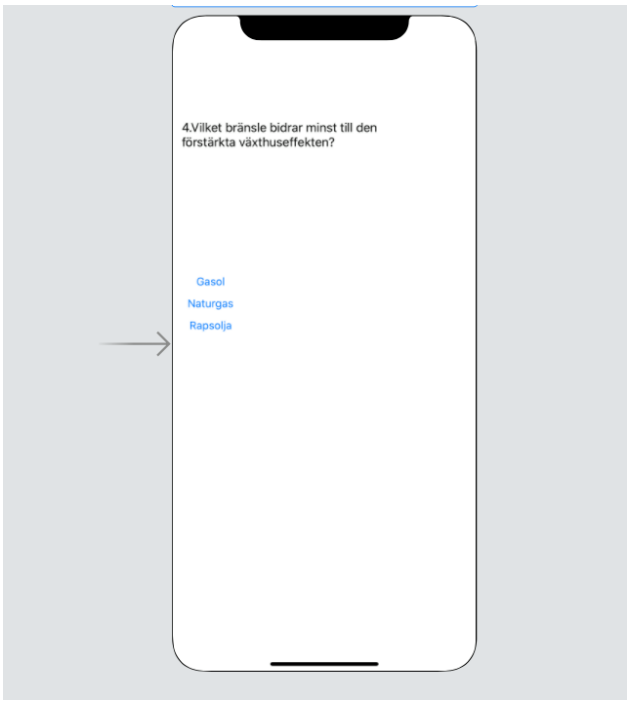




When user is logged in he/she can start the quiz or check their last score







The app will have choose questions where user can chose the answers
